Tip

Your customers will be pleased with every opportunity to save money! You can give the ideas for that, e.g. with the

febi rear axle bearing for the left and right sides of the Ford Focus rear axle

febi no. 22699

ref. no. 98AG5K896AB

At the time being, Ford delivers this bearing in combination with the steering knuckle. This means that your customers has to pay approximately 130 € per side plus assembly costs for the entire steering knuckle every time the bearing is worn out. febi bilstein offers the axle shaft bearing as a separate part – in OE quality, for the assembly on the left and right sides and at a price that is a fraction of the costs for a complete exchange.

By the way, the febi axle shaft bearing 22699 is suited for all Ford Focus from 1998 to 2004 – whether saloon, estate car or notchback!

Please ask your febi partner for spare parts by febi bilstein. You will also find all spare parts at www.febi.com.
