

febi 21855 27355, 27400

To Fit:
Ford Cougar, Mondeo and Scorpio models

Anti-roll bar bush

There has been a change in the design of the front anti-roll bar mounting, by the vehicle manufacturer. The former semi-circular design has now been replaced by a flat design. This means when replacing the anti-roll bar bush, the mounting clamp must also be changed. The stabilizer mounts and clamps should always be replaced in pairs to ensure a professional level of servicing. 27400 comes as a complete kit, including bushes, brackets and bolts for both sides.
